Part(s) to be Repaired:

Problem Experienced:

Estimated Cost of Repair, as Quoted by M&M RV Electronics:

Repair Process Procedure

After an item is received for repair, there will be a 7-10 business day lead time (unless otherwise noted) before we start to repair it. Please note: there is a \$95 diagnostic fee for all repairs (unless otherwise directed by one of the technicians), in addition to the cost of the repair itself. Parts are repaired in the order they are received. We will contact you once the repair is completed. Billing information for cost of repair and return shipping will be collected at that time as well. Your part will be shipped back to you after billing has been completed. If we have been unable to collect payment after attempting to contact you for 10 business days after repairs have been completed, the part will be considered abandoned and become property of M&M RV electronics. ***IMPORTANT* Please be sure you speak with someone at M&M to assure you send in everything needed.**

THANK YOU FOR CHOOSING M&M!
